EXPERIMENTS IN KOCHI: EARLY RESULTS

Sugar content: time analysis

	Control	Experimental	Difference
ist month	9,5±0,8	10,5±0,4	+1
2nd month	10,4±0,5	12 ±1,3	+1.6

Spatial analysis (over the 2 months):

Experimental: $11,34\pm1,25$ (n = 7) Classical music (Ravel): $10,24\pm1,16$ (n = 5) Next to heating: $10,17\pm1,13$ (n = 6) True control: $9,72\pm0,75$ (n = 18)

The difference in sugar content between experimental and centrol tomatoes is highly significant.
